

## **Animals and their Environment**

*Enrollment is for the first semester only.*

*Continuation classes will be offered as Sem. 2 classes starting in January*

**Animals and their Environment** A “hands-on” science class for young zoologists (Sem. 1)

**Grades:** 1-3

**Prerequisites:** none

**Materials:** folder

**Class size:** minimum 5, max 10

**Class Fees:** \$25 (\$20 if attending Eureka as well) **Materials:** \$15/semester

**Synopsis:** For all young students interested in learning about animals and how God provided for their needs. We will learn about habitats, food chains, ecology and how to help protect the environment through hands on activities and games. We will work on several projects and our final one will be building a model zoo.

*Some research will have to be done at home.*

**Instructor:** Dr. Sylvie Kitman. Born and raised in France. Graduate studies in both France and the US (veterinary medicine, biology, environmental sciences). Rotary International scholarship recipient. Experience as a wildlife veterinarian in Europe, Hawaii, and Australia. Has been a tutor and educational coach for more than 20 years working with special needs as well as gifted children both in French and English.. Homeschool mother of 5 (12 years). My youngest is now 10.
